## CLEANING & WATERPROOFING for Clothing, Footwear & Equipment

## EASIER

Nikwax WaterBased products are easier to use than other brands because ...

#### FABRIC TREATMENTS

- do not have to be ironed or tumble dried to activate water-repellency (does your jacket have to be tumble-dried on a high heat? You don't have to with Nikwax).
- can be applied in the washing machine.
- can be applied by hand.
- do not blow away in the wind.

#### FOOTWEAR TREATMENTS

- can be applied to damp materials - no need to wait.
- work first time - no need to wait and apply again.
- have an easy to use sponge applicator - all the product goes on the boot, doesn't blow away.
- do not require any warming of wax treatments or the boot.

#### EQUIPMENT TREATMENTS

- can be painted on, washed in, soaked in a bucket, sprayed on to fabric, ropes, paper.

Whatever you wish to clean or waterproof Nikwax products are **EASIER TO USE**.

## SAFER

Nikwax WaterBased products are safer ...

#### FOR THE USER BECAUSE THEY:

- are non-toxic.
- are non-flammable.
- do not give off fumes.

#### FOR THE ENVIRONMENT BECAUSE THEY:

- prolong the life of your gear so less of the Earth's resources are used to make new gear.
- do not contain harmful chemical solvents.
- do not contain environment damaging propellant gases.
- do not contain animal products.
- are not tested on animals.
- are packed in recyclable containers.

Whatever you wish to clean or waterproof, Nikwax products are **SAFER TO USE**.

## DRIER

Nikwax WaterBased products keep you drier because ...

- they maintain or renew the waterproofing required to make breathable items breathe - so you don't get wet from your own sweat. Suitable for use on Gore-Tex® & Sympatex® garments\*.
- the active ingredients are carried in water and will soak in wherever water can get in, i.e. WaterBased products target leaks.
- the tough flexible TX.10i® elastomer coats all the fibres not just the surface so doesn't get rubbed off by grass, rucksack straps etc.
- soaks in exactly where needed - no worries about missing bits.
- you get more waterproofing power for your money.
- Nikwax products are being continuously scientifically developed to keep ahead of modern garment, footwear and equipment technologies. That's why leading manufacturers recommend Nikwax WaterBased products.

Whatever you wish to clean or waterproof, Nikwax products keep you **DRIER**.
